Who is John Galt? Do you remember AT&T - Phone services were good then. Do not permit those who cant try to stop those who can. Every High Tech corporation had an equal opportunity to develop and beat Microsoft at their game but the mamby pamby s couldn t compete so they turned to the poloticians. This puffed them up and they went for it - Let s not get Microsoft and screw up the whole world. No operating system other than Microsoft can come close to what the world wants. Stop wasting tax payers dollars and leave the market sort itself out. I object to this frivolity!
